About

My name is Aldo Solano and I'm an experienced Data Analyst and Full Stack Web Developer from Mexico City. Educated at ITESM Full Stack Flex Program, I also have a Computer Science degree at UV. Creativity, organization, patience and curiosity are my strongest intrinsic skills. My technical skills include the development and design of MERN web apps, C#, Java and SQL Server; that combined with my experience in collaborative, deadline-driven environments make me a strong addition to any Full Stack Web Development team. I'm also a senior DBA with 8+ years of solid experience working with Data Mining and Business Intelligence Technologies and over 1 year working on Web Development and Web Design as a Freelance.
